

Extreme Wear Resistance

Extreme Wear Resistant Cushion Foot

The abrasive pavement has met its match. The extreme wear cushion foot is built stronger to last longer - **up to 2.5x times longer** than the current mild steel cushion foot. Maximizing durability with 450 HBW abrasion resistant steel, this cushion foot will fight back against wear on the bottom of the shoe.

- Produced utilizing the 450 HBW abrasion resistant steel.
- Lasts longer and is stronger than standard footwear options.
- Will retrofit onto any current cushion foot landing gear.
- Unique octagon shape for quick identification.
- Available as an option on new orders.

For full landing gear set part numbers, please contact sales.
