

K400 Series Drop Leg

Design Features

- Spring assisted drop leg retraction for easy use.
- Convenient down stop prevents over extension.
- Easy twist handle allows for quick extension and retraction of the drop leg.
- All the design benefits of our standard duty series.
- Cover and bushings sealed to keep moisture out.
- Optional 10 bolt mounting pattern adds mounting rigidity.

	Single Leg Only	Set
Max. Static Load Rating*	12,500 lbs	25,000 lbs
Rated Lift Capacity	12,000 lbs	12,000 lbs

*When properly braced on a trailer.

Gear Ratio
5.3 Turns = 1" Travel

Drop Leg Operation

1. Rotate the handle to the released position.
2. Place foot on base plate and push to desired location.
3. Rotate the handle back to the locked position.
4. Lift foot slowly from the base plate until it automatically locks into the next hole position.

For complete operation procedures please request user's manual LT-LG01-14.
