

JSK3CNWL

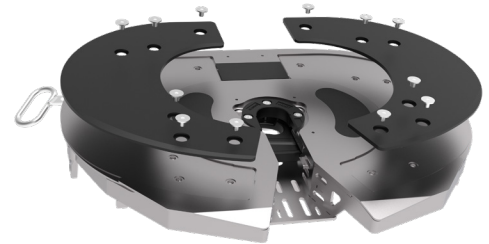

Fifth Wheels

NEW Lightweight Technology

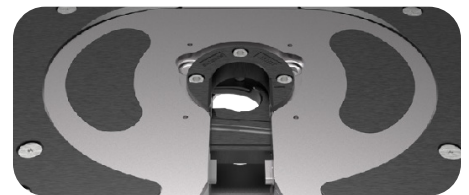

The JSK3CNWL is JOST's lightweight option for highway applications--without the expensive cost of aluminum. This model features a fusion welded steel top plate that incorporates a carbon fiber beam.

- Same proven locking mechanism
- Convertible to a standard lubricated fifth wheel
- Same surface area as JSK37UW low lube fifth wheels
- Replaceable steel wear ring
- Compatible with all JOST brackets

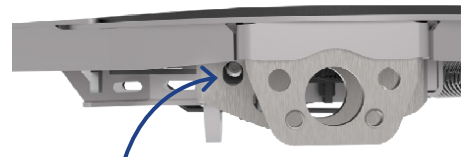

Low Lube Liners

Composite pads are bolted down to the top plate for quick and easy replacement when worn.

Steel Wear Ring

Built to last in tough conditions, keeping your JOST fifth wheel on the road longer.

Infinite Internal Adjustment

Shortened internal adjustment for weight and space savings.
